Developer | iOS (Swift) & .NET | Mobile & Web Applications | Application Support | Figma & UI/UX

Al Asimah, Kuwait

Summary

Developer with a strong background in building and supporting mobile and web applications. Over the course of my career at Oula Fuel Marketing Company, I've grown from Technical Support Engineer to Developer — gaining hands-on experience across the full software lifecycle.

I specialize in iOS development using Swift, web solutions with .NET and Bootstrap, and UI/UX design using Figma. My roots in technical support give me a unique edge — I understand systems from the ground up, which makes me a stronger developer and a more effective collaborator.

Experience

Oula Fuel Marketing Company

6 years 11 months

Developer

March 2026 - Present (8 months)

Junior Developer

April 2023 - March 2026 (3 years)

• As a secondary responsibility, when required, perform some of the roles of Application Support Engineer.

• Evaluate software-hardware interfaces and develop specifications and performance requirements.

• Designing and developing efficient software systems and solutions as per requirements.

• Maintaining coding standards and technical documentation.

• Working with customers or departments on technical issues including software system design and maintenance.

• Monitor quality and performance of applications.

• Support, maintain and monitor all public & intranet web applications and mobile applications.

• Providing solutions to integrate with and extend the functionality of existing systems as well as providing secondary support.
• Admin access with full privileges on Oula, Ultra logistics applications/systems under the purview of the team for the purposes of administration, monitoring and resolving issues in production.
• Prepare project deliverables – requirements analysis, test cases, user guides
• Using appropriate programming languages and software frameworks to develop solutions to meet clients' needs.
• Keeping up to date with the terminology, concepts and best practices for coding mobile apps.

Technical Support Engineer
December 2019 - April 2023 (3 years 5 months)

• Provided technical and functional support of 43 fuel stations.
• Monitored all fuel stations data connection reporting any abnormalities or disruptions.
• Troubleshooting.
• Diagnose and troubleshoot technical issues, including account setup and network configuration.
• Track computer system issues through to resolution, within agreed time limits.
• Research and identify solutions to software and hardware issues.
• Properly escalate unresolved issues to appropriate internal teams (e.g. software developers).
• Coordinated logistics of the client support team, QA, and development teams to resolve software issues.
• Implemented hardware, software, and system upgrade and weekly maintenance.
• Aware of retail application services like WCF Forecourt service, EPS (Electronic payment service).
• Support Installation and configuration DOMS PSS 5000 and Complete knowledge of forecourt configuration using tools PSS configurator (For forecourt configuration like Tank, Fulling point, pump bit setting , product & price configuration etc.) and Demo POS (For instant price change, pump decimal point, authorized pump, open & close pump, check fallback total etc.) aware about DOMS modules pump level.
• Automatic Tank Gauging (ATG) system TLS 450 Plus programming and configuration.

Education

Basic education college

Bachelor's degree, Educational Technology · (September 2014 - December 2018)
